LETTER OF REQUEST FOR SUPPORT

Dear Colleagues,

First of all, I want to express my sincere gratitude regarding help and support you have been providing for Ukraine during last several months of war, which is ongoing at my native country. Your sustention is one of the reliance due to which Ukraine is still standing every day for its freedom and liberty.

Even though war is ongoing, education system is still functioning in its adaptive manner to provide students with high quality of education. Many young Ukrainians has transferred from Eastern part to the Central and Western part of Ukraine, because of war, thus forming a need to assure proper educational conditions for students in present time.

I have been assigned as a head of Department of Restorative Dentistry at Uzhhorod National University starting from November 2022. Because of department is adapting to function in condition of war, unfortunately we struggle with partial deficiency of materials and supplies, needed to assure, and keep high quality of education process and practically-oriented teaching of future dental specialists.

Due to all above mentioned I am asking my friends, colleagues, partners, and associative persons for any help with which they potentially could support development of Department of Restorative Dentistry and help students to gain high quality dental education in present conditions.

I am personally looking for the EU educational support grants and has applied for several here in Ukraine and abroad already, but grants are long-beginning perspective, while education is ongoing right now. We do not need financial support, but we are in need dental materials and instruments, laptops and technical support devices for education. We are not asking for something new, but we will be really grateful for already used supplies, materials, and instruments, or some that can be restored, or used for demonstrational objective during the classes.

I can assure you regarding proper use of any provided supply, materials, and technical devices only for educational reasons within Department of Restorative Dentistry under my personal guidance. Also, if any additional documentation will be needed to set official manner of cooperation, I am personally willing to assure managing of such. Department can assure proper reports regarding usage of provided support, while also we are open minded for any kind of educational and scientific cooperation.

Maybe you have some contacts I may refer to with information mentioned in this letter, I will be grateful for those too.

Please excuse me again asking for help, as I understand that you have already supported Ukraine with bunch of aid at these hard times, but I hope you will understand. I just hope we can assure Ukrainian students with proper quality education, while the Ukrainian military defending their freedom. We all have our own frontlines, in which we can do something to improve the education perspective of future dental specialists in Ukraine.

Head of Department of Restorative Dentistry
PhD, DDS, Academic Editor of PBOCI,
Ambassador of Digital Dentistry Society in Ukraine

Myroslav Goncharuk-Khomyn
